* minimum deposit amount 10,00 EUR

10. SAVINGS AT SIGHT – fixed interest rate

- 0,01% za EUR
- 0,01% za CHF
- 0,01% za USD

11. DEPOSIT INSURANCE

Deposits deposited with the Bank are insured with the Croatian Deposit Insurance Agency (HAOD). HAOD insures creditors' deposits in each credit institution up to and including the amount of EUR 100,000.00, regardless of the number of its bank accounts, the amount of funds under them, the currency and the place where these bank accounts are maintained.

11. OTHER PROVISIONS

11.1. Interest rates are expressed on an annual basis.

The effective interest rate (APR) is equal to the nominal interest rate reported.

11.2. The calculation and crediting of interest is done within the deadlines set by the contract or when closing the account, and the calculation is done for the actual number of days in the month / the actual number of days in the year, in such a way that the first day enters and the last day does not enter the calculation.

11.3. Term savings can be arranged with a monthly interest payment or interest payment upon the expiry of the term deposit.

11.4. It is possible to agree on an interest rate different from the interest rate in the regular offer specified in this Decision. A decision on a higher or lower interest rate is made on the basis of a decision of the competent level prescribed by an internal act of the Bank.

11.5. Conditions for early termination of a general-purpose term deposit and the method of calculating interest rates:

- for term deposits from the Regular Offer or Special Offer or the "Salary Plus Savings" offer contracted in published currencies at which interest rates are expressed, and for which the maturity of less than 12 months and 1 day has been maintained at the time of early maturity of the term deposit, the interest rate for demand savings is recognized for the period from the date of conclusion to the date of termination of the contract.
- for term deposits from the Regular Offer or Special Offer contracted in published currencies at which interest rates are expressed, and for which at the time of early maturity of the term deposit the maturity longer than 12 months and 1 day has been held, interest on deposits is recognized for the first shorter term deposit period from the Bank's Regular Offer valid on the day of termination of the contract, i.e. for the period from the date of conclusion to the date of termination of the contract, unless the interest rate for the first shorter term deposit period is higher than the agreed interest rate, in which case the Bank calculates the agreed interest rate.
- if, at the time of early maturity, even the shortest term deposit period from the Regular Offer or the Special Offer or the "Salary Plus Savings" offer has not expired, interest is calculated at the interest rate for demand savings.
- if the contract approves an incentive supplement to the interest rate from the Regular Offer or the Special Offer or the "Salary Plus Savings" offer, in the event of early termination of the contract, the depositor is not entitled to the calculation and payment of the incentive supplement.
- for time deposits contracted in other currencies for which the interest rate is not stated in this Decision, but it is determined by the contract, interest at the interest rate for demand savings shall be recognized for early term deposits, unless otherwise prescribed by the contract itself.
- in accordance with the individual term deposit agreement concluded with the depositor.

11.6. In the event of early termination of a term deposit in the following cases, the Bank may grant the depositor the agreed interest rate (including the incentive supplement):

- when the newly contracted term deposit increases the principal of the term deposit in relation to the amount of the terminated contract (condition: at least the same maturity period as in the case of the terminated contract)
- when the maturity of the newly contracted term deposit is longer than the maturity of the terminated contract (condition: at least the same amount of principal as in the case of the terminated contract)
- in the case of conversion from a non-purpose to a special-purpose term deposit, provided that an addendum to the term deposit agreement is signed, which determines the conversion of the deposit
- in the case of early final repayment of the loan from the funds of the deposit that was collateral, unless the contract stipulates otherwise
- after the final repayment of the loan, for which the funds of the deposit that was collateral were not used, unless the contract stipulates otherwise.

11.7. Interest tax (capital income tax) is calculated on the total paid/imputed interest and premium in accordance with the Income Tax Act.

11.8. The fee for early termination of deposits is charged in accordance with the Decision on Fees in Consumer Business, unless otherwise agreed, as follows:

- the fee for early termination of a deposit, which is a collateral instrument, is charged in accordance with the Decision on Fees in Consumer Transactions
- in the case of auto-renewal deposits, the fee is charged only when the depositor terminates the first term deposit cycle early; If he terminates the deposit after the first term deposit cycle has expired, no fee is charged
- No fee is charged when the deposit is terminated with the aim of increasing the deposit amount (provided that the term deposit period is the same or longer than originally agreed) or to extend the term deposit period (provided that the deposit amount remains the same or increases from the originally agreed amount).
- No fee is charged in the event that the depositor has passed away.

12. FINAL PROVISIONS

This Decision shall enter into force on the day of its adoption and shall apply from 01.12.2025.
